SUMMARY

Computer Science graduate with a strong interest in web development and software engineering. I have built practical projects including an AI-Integrated Virtual Clinic System and a complete E-Commerce Management System, gaining hands-on experience in both frontend and backend development. I enjoy solving real-world problems through technology and continuously learning new tools and frameworks to improve my skills. Proficient in PHP, MySQL, WordPress, JavaScript, HTML, CSS, Git/GitHub, and responsive web development.

EDUCATION

The Islamia University Of Bahawalpur Bahawalnagar Campus
Bachelors of science in Computer Science - *CGPA 3.75*

2022-2026

- **Final Year Project:** AI Integrated Online eDoctor / Virtual Clinic System is a platform that enables users to access healthcare services online, manage appointments, and receive intelligent health assistance.

SKILLS

Programmin language: PHP, SQL, JavaScript, (jQuery), Html5, CSS3, Bootstrap

Databases: MySql, MongoDB

Tools & Platforms: Git, GitHub, Xampp, VsCode, phpMyAdmin,

Wordpress Development: Create Pages, Custom Plugins Developmet, Theme Customization

PROJECTS

AI Integrated Online eDoctor / Virtual Clinic System . HTML5, CSS3, Bootstrap, JavaScript, PHP, MySql

- Developed a web-based virtual clinic platform that allows patients to register, manage profiles, book appointments, and consult doctors online through a user-friendly interface.
- Integrated AI-powered health assistance to provide preliminary symptom analysis and healthcare guidance, helping users make informed decisions before seeking medical consultation.
- Implemented secure patient and doctor management modules, appointment scheduling and authentication features using PHP, MySQL, HTML, CSS, and JavaScript.

item

E-Commerce Store & Inventory Management System . HTML, CSS, Bootstrap, JavaScript, PHP, MySql

- Developed a complete e-commerce platform with separate customer and admin panels, enabling users to browse products, manage carts, and place orders online.
- Designed and implemented an admin dashboard for product management, category management, inventory tracking, order processing, and customer account management.
- Built secure authentication and order management features, allowing administrators to monitor sales, update order statuses, manage stock levels, and generate a streamlined shopping experience.
